

Safe-T-Rail II

Installation Instructions - Updated as of 11/30/17

Step #1

Slide the Safe-T-Rail handle-lower into the Safe-T-Rail base and attach using the 3/8 x 2-3/4" hex cap bolt, washers and locknut (see Fig. 1).

Step #2

Attach the Safe-T-Rail base cover to the Safe-T-Rail base using the 1/4 x 3/4" flat head screws (see Fig. 2).

Step #3

Attach the Safe-T-Rail struts to the sides of the Safe-T-Rail base using the 5/16 x 3/4" bolts and 5/16 locknuts (see Fig. 3).

Step #4

Slide the Safe-T-Rail bracket onto the Safe-T-Rail II handle-upper. Next peel the white backing off the Safe-T-Rail II bracket pad and attach to the Safe-T-Rail bracket (see Fig. 4). **Note: This does not get attached to the spa cabinet. It is a bumper only.**

Step #5

Slide the Safe-T-Rail II handle-upper over the Safe-T-Rail II handle-lower and attach the struts using a 3/8 x 2-3/8" hex bolt, washers and locknut (see Fig. 5).
